RISK POOLS

FINANCIAL STATEMENTS

GENERALINSTRUCTIONS

Financial statements should be presented in one of the following methods:

- <u>Separate Reporting</u> Almost all public entity risk pools stand alone as a separate accounting and reporting entity. These pools are required to have full-accrual accounting systems and conform to generally accepted accounting principles applicable to proprietary funds of governmental units.
- Pools that are included as part of a combined general government reporting entity that do not issue separate financial reports should present the required supplementary information described in Section 5 as <u>statistical information</u> in the combined entity's comprehensive annual financial report.

Blank formats of financial statements applicable to public entity risk pools have been provided in this document. The Statement of Cash Flows may be presented using either the direct method (E-1A) or the indirect method (E-1B). Include only those accounts used by your pool. Prior year information (optional) should be taken from the prior year's financial statements.

When presenting comparative financial statement information, show current year data in the left hand column and prior year data in the right hand column. If you did not prepare a particular statement type last year, you will not be able to prepare that statement on a comparative basis for this year. In that case, eliminate the prior year column of data and date the form for the current year only.

Since the GASBS 34 states that all component units, regardless of the amount of their revenues, should implement the requirements of the Statement no later than the same year as their primary governments, the applicable component units should revise their financial statements accordingly.

_

^{1/} In June 1999, the Governmental Accounting Standards Board (GASB) approved Statement 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*. This and consecutive statements are <u>not</u> reflected in this package.

INDIVIDUAL FUND STATEMENTS

GENERAL INSTRUCTIONS

Examples of individual fund statements applicable to public entity risk pools have been attached for reference purposes only. These statements are to be prepared by all public entity risk pools that account for more than one pool type in their financial statements.

Each statement should include only accounts used by that particular type of pool.

Prior year information (optional) should be taken from the prior year's financial statements. When presenting comparative financial statement information, show current year data in the left hand column and prior year data in the right hand column.

RISK POOLS

NOTES TO FINANCIAL STATEMENTS

GENERAL INSTRUCTIONS

The sample Notes To Financial Statements which follow were designed to provide the disclosures required for public entity risk pools. They are intended to furnish you with ways of phrasing the disclosures you will need to make. Be sure to revise these sample documents to fit the unique circumstances of your pool, to delete disclosures that do not apply to your operations, and to add others that we did not include but which are needed to help a reader understand your financial statements.

Public entity risk pools must make at least the following disclosures:

- (1) A description of the risk transfer or pooling agreement, including the rights and responsibilities of the pool and the pool participants. Also, include a brief description of the number and types of entities participating in the pool.
- (2) The basis for estimating the liabilities for unpaid claims and claim adjustment expenses. State that the liabilities are based on the estimated ultimate cost of settling the claims, including the effects of inflation and other societal and economic factors.
- (3) The nature of acquisition costs capitalized, the method of amortizing those costs, and the amount of those costs amortized for the period.
- (4) The face amount and carrying amount of liabilities for unpaid claims and claim adjustment expenses that are presented at present value in the financial statements and the range of annual interest rates used to discount those liabilities.
- (5) Whether the pool considers anticipated investment income in determining if a premium deficiency exists.
- (6) The nature and significance of excess insurance or reinsurance transactions to the pool's operations, including the type of coverage, reinsurance premiums ceded, and estimated amounts that are recoverable from excess insurers and reinsurers and that reduce the liabilities as of the balance sheet date for unpaid claims and claim adjustment expenses.
- (7) A reconciliation of total claims liabilities, including an analysis of changes in aggregate liabilities for claims and claim adjustment expenses for the current fiscal year and the prior fiscal year, in this tabular format:
 - (a) Amount of liabilities for unpaid claims and claim adjustment expenses at the beginning of each fiscal year.
 - (b) Incurred claims and claim adjustment expenses:
 - Provision for insured events of the current fiscal year.
 - Increase (decrease) in the provision for insured events of prior fiscal years.
 - (c) Payments:
 - Claims and claim adjustment expenses attributable to insured events of the current fiscal year.
 - Claims and claim adjustment expenses attributable to insured events of prior fiscal years.

- (d) Other. (Provide an explanation of each material item.)
- (e) Amount of liabilities for unpaid claims and claim adjustment expenses at the end of each fiscal year.
- (8) The aggregate outstanding amount of liabilities for which annuity contracts have been purchased from third parties in the claimants' names and the related liabilities have been removed from the balance sheet. (Annuity contracts used to settle claims for which the claimant has signed an agreement releasing the entity from further obligation and for which the likelihood that the pool will be required to make future payments on those claims is remote should not be included in this disclosure.)

The notes are an integral part of the accompanying financial statements.

NOTE 1 - GENERAL

(Several alternatives with sample text are presented below. Include a list of all participating members of the risk pool on a separate schedule (Schedule T-2).)

(Alternative No. 1, Description of the Public Entity Risk Pool. 2)

See accompanying Notes To Financial Statements on page 8-1 which all public entity risk pools must prepare and send to each participating member to be included in their notes to the annual financial reports.)

The __(pool name) __(Pool) was organized in _____, ___ to provide a program of property and casualty and

(Or, Alternative No. 2, Description of the Pool.

employee health and accident coverage for its member organizations. In accordance with <u>(statute)</u> , all political
subdivisions in the state of are eligible to participate. The program's general objectives are to formulate,
develop, and administer, on behalf of the member political subdivisions, a program of insurance, to obtain lower costs for
that coverage, and to develop a comprehensive loss control program. Political subdivisions joining the Pool must remain
members for a minimum of years; a member may withdraw from the Pool after that time by giving months notice.
Subdivisions applying for membership in the Pool may do so on approval of two-thirds vote of the board of the Pool. The
Pool underwriting and rate-setting policies have been established after consultation with actuaries. The Pool members are
not subject to a supplemental assessment in the event of deficiencies. Annual premium increases are limited to
percent of the prior year's premium. If the assets of the Pool were to be exhausted, members would not be responsible for
the Pool's liabilities. Pool members currently include cities with populations ranging from to and
counties with populations ranging from to) ^{2/}
(Or, Alternative No. 3, Description of the Organization.
The(pool name)(Pool) was formed in under a joint powers agreement in accordance with(statute)of the
state of The agreement is to provide a cooperative program of group funding and risk management of
property and casualty, workers' compensation, and employee health and medical claims for the employees of the Cities of
"X," "Y," and "Z." The Pool is not intended to function as an insurance company for the cities. Rather, it is a means of

1/ Insert the official name of the public entity risk pool.

insurance risks are not transferred to the Pool.)^{2/}

If the risk pool is a component unit of another entity, the pool should acknowledge that relationship in this note. The risk pool should identify the primary government and describe the relationship with it.

combining the administration of claims and of obtaining lower insurance rates. Although premiums billed to the cities are determined on an actuarial basis, ultimate liability for claims remains with the respective cities and, accordingly, the

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the <u>(pool name)</u> on form to generally accepted accounting principles as applicable to proprietary funds of governmental units (in most respects). The following is a summary of the more significant policies (including identification of those policies which result in material departures from generally accepted accounting principles):

a. <u>Basis Of Accounting And Presentation</u>

The accounting records of the Pool are maintained in accordance with methods prescribed by the State Auditor's Office under the authority of Chapter 43.09 RCW. The Pool also follows the accounting standards established by the Governmental Accounting Standards Board (GASB) Statement 10, Accounting And Financial Reporting For Risk Financing And Related Insurance Issues, as amended by the GASB Statement 30, Risk Financing Omnibus, the GASB Statement 31, Accounting and Financial Reporting for Certain Investments and for External Investment Funds, and GASB Statement 33, Accounting and Financial Reporting for Nonexchange Transactions.

The Pool uses the full-accrual basis of accounting where revenues are recognized when earned and expenses are recognized when incurred. $\frac{2}{}$ Capital asset purchases are capitalized and long-term liabilities are accounted for in the (appropriate) fund(s).

(Unbilled receivables are recorded at year end.) $\frac{3}{}$

b. <u>Capital Assets And Depreciation</u>

See Note ____.4/

- $\underline{1}$ Insert the official name of the public entity risk pool.
- If modified-accrual recognition principles are used for any reason, be sure to disclose: (a) their identity; <u>and</u>, (b) that such approaches are not in accordance with generally accepted accounting principles (GAAP).
- 3/ If material receivables are <u>not</u> accrued at year-end, this should be disclosed along with the clause, "which is a departure from generally accepted accounting principles."
- $\underline{4}$ Insert note number for disclosure of capital assets.

c.	Restricted Funds
	In accordance with bond resolutions (and certain related agreements), separate restricted funds are required to be established. The assets held in these funds are restricted for specific uses, including (construction,) debt service and other special reserve requirements.
d.	Receivables 1/
e.	<u>Inventories</u>
	Inventories are valued at2/ which approximates the market value.
f.	<u>Investments</u>
	See Note ^{3/}
<u></u>	Disclose the policy for estimating and writing off uncollectible accounts.
<u>2</u> /	Insert "FIFO-first in, first out," "average cost," etc. If "LIFO-last in, first out," is used, omit the phrase about market value.

Insert note number for disclosure of investments (i.e., Note 3 in this sample).

<u>3</u>/

g.	Compensated Absences
	Compensated absences are absences for which employees will be paid, such as vacation (and sick) leave. The Pool records unpaid leave for compensated absences as an expense and liability when incurred.
	Vacation pay, which may be accumulated up to days and is payable upon resignation, retirement or death. Sick leave may accumulate(indefinitely/up to hours)1/
h.	Unamortized Debt Expense
	Costs relating to the sale of bonds are deferred and amortized over the lives of the various bond issues.
i.	Construction Financing 3/
j.	Purchase Commitments 4/
<u>1</u> /	If the pool has a policy that allows a payment for accrued sick leave upon resignation/termination, include a text to reflect this policy. For example:
	(Upon resignation, any outstanding sick leave is lost.) (Sick leave does not vest until death or retirement thus no current liability is recognized.) (If an employee terminates with at least ten years of service, he or she will be paid for sick leave balances up to thirty days, at one-half his or her final pay rate.), etc.
<u>2</u> /	Be sure to explain the circumstances.
<u>3</u> /	This note should disclose any cost-sharing agreements or other long-term financing or credit agreements that the pool has entered into.

This note should disclose any long-term purchase commitments, take-or-pay agreements, etc.

<u>4</u>/

k. Unpaid Claims Liabilities

The Pool establishes claims liabilities based on estimates of the ultimate cost of claims, including future claim adjustment expenses, that have been reported but not settled, and claims that have been incurred but not reported. The length of time for which such costs must be estimated varies depending on the coverage involved. Estimated amounts of salvage and subrogation and reinsurance recoverable on unpaid claims are deducted from the liability for unpaid claims. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liability, and damage awards, the process used in computing claims liabilities does not necessarily result in an exact amount, particularly for coverages such as general liability. Claims liabilities are recomputed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors. A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made.

1. <u>Deferred Policy Acquisition Costs</u>

Acquisition costs, which consist primarily of salaries, inspection and medical exam fees, and certain
underwriting expenses, vary with, and are primarily related to, the issuance of new insurance policies. These
costs are deferred and amortized on a straight-line basis over the life of the insurance contract. Deferred
acquisition costs are reviewed periodically to determine if they are recoverable from future income, including
investment income. If the deferred costs are not recoverable, they are charged to expense in the period of the
review. Amortization of deferred costs in and were \$ and \$,
respectively.

m. Reinsurance

The Pool uses reinsurance agreements to reduce its exposure to large losses on all types of insured events.
Reinsurance permits recovery of a portion of losses from reinsurers, although it does not discharge the primary
liability of the Pool as direct insurer of the risks reinsured. The Pool does not report reinsured risks as liabilities
unless it is probable that those risks will not be covered by reinsurers. The amount deducted from claims
liabilities as of, and, for reinsurance was \$
and \$, respectively. Premiums ceded to reinsurers during and were \$
and \$, respectively.
Member Assessments And Unearned Member Assessments
Member assessments are collected in advance and recognized as revenue in the period for which insurance

o. <u>Claims Reserves</u>

n.

Claims are charged to income as incurred. Claim reserves represent the accumulation of estimates for reported, unpaid claims, plus a provision for claims incurred, but not reported. These estimates are continually reviewed and updated, and any resulting adjustments are reflected in current earnings.

protection is provided. The assessment is calculated based on _____

 $\underline{1}$ Describe the basis of the calculation for member assessments.

p. Reserve For Unallocated Loss Adjustment Expenses

The reserve for unallocated loss adjustment expenses represents the estimated cost to be incurred with respect to the settlement of claims in process and claims incurred but not reported. Management estimates this liability at the end of each year based upon cost estimated provided by the third party administrator. The change in the liability each year is reflected in current earnings.

q. <u>Exemption From Federal And State Taxes</u>

Pursuant to revenue ruling number 90-74, income of Municipal Risk Pools is excluded from gross income under IRC Section 115(1).

Chapter 48.62 RCW exempts the Pool from insurance premium taxes, and business and occupation taxes imposed pursuant to Chapter 82.04 RCW.

r. <u>Cash And Cash Equivalents</u>

For purposes of the Statement of Cash Flows, the <u>(pool name)</u> considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

NOTE 3 - DEPOSITS AND INVESTMENTS

As required by state law, all deposits and investments of the Pool's funds (except as noted below) are in obligations of the U.S. Government, U.S. agency issues, obligations of the state of Washington, general obligations of Washington State municipalities, (the State Treasurer's Investment Pool,) (bankers' acceptances,) certificates of deposit with Washington State banks, savings and loan institutions, or other investments allowed by Chapter 39.59 RCW. (Investments of pension trust funds are not subject to the preceding limitations.)

All temporary investments are stated at $\frac{1}{2}$	Other property and investments are shown on the balance sheet
at 1 /	

(Other property consists of real estate held (for the production of (rental) income) ((and/or) for future use).)

The Pool's deposits and certificates of deposit are entirely covered by federal depository insurance (FDIC) or by collateral held in a multiple financial institution collateral pool administered by the Washington Public Deposit Protection Commission (PDPC).

The Pool's investments are categorized to give an indication of the risk assumed at year-end. The following summary shows the Pool's investments at year-end categorized by risk. Category 1 includes investments that are either insured, registered or held by the Pool or its agent in the Pool's name. Category 2 includes uninsured and unregistered investments which are held by the counterparty's trust department or agent in the Pool's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the counterparty, or its trust department or agent but not in the Pool's name.

1/ Disclose the following:

- a. The methods and significant assumptions used to estimate the fair value of investments, if that fair value is based on other than quoted market prices.
- b. The policy for determining which investments, if any, are reported at amortized cost.
- c. For any investments in external investment pools that are not SEC-registered, a brief description of any regulatory oversight for the investment pool and whether the fair value of the position in the pool is the same as the value of the pool shares.
- d. Any involuntary participation in an external investment pool.
- e. If risk management pool cannot obtain information from an investment pool sponsor to allow it to determine the fair value of its investment in the pool, the methods used an significant assumptions made in determining that fair value and the reasons for having had to make such an estimate.
- f. Any income from investments associated with one fund that is assigned to another funds.

(For more detail, see the GASB Statement 31.)

(GAIN AND LOSSES ON INVESTMENTS) 4/				

 $\underline{1}$ If the public entity risk pool uses reverse repurchase agreements, include the following:

All sales of investments under reverse repurchase agreements are for fixed terms. In investing the proceeds of reverse repurchase agreements, the <u>(pool name)</u> policy is for the term to maturity of the investment to be the same as the term of the reverse repurchase agreement. Such matching existed at the year end.

Derivatives are generally defined as contracts whose value depends on, or derives from, the value of an underlying asset, reference date, or index. For more information see GASB Technical Bulletin No. 94-1, Disclosures about Derivatives and Similar Debt and Investment Transactions.

This disclosure is necessary if the risk pool has used, held, or sold any derivatives or similar instruments during the period covered by the financial statements, or if the pool participated in an investment pool or mutual fund that used, held, or sold derivatives during the period, regardless of whether the assets or liabilities resulting from those transactions are reported on the balance sheet.

(FOOTNOTES CONTINUED)

The note should include:

- nature of transaction.
- reason for entering into transaction,
- discussion of the risk pool's exposure to credit risk, market risk, and legal risk (the discussion of risk should be made only to the extent that these risks are above and beyond those risks that are apparent in the financial statements or are otherwise disclosed in the notes to the financial statements).
- if information about derivative in investment pools or mutual funds is not available, that fact should be disclosed.
- 3/ If in the period covered by the financial statements, the pool participated in the securities lending transactions, the following information should be disclosed:
 - ? source of legal or contractual authorization for the securities lending transactions;
 - ? general description of the securities lending transactions;
 - type of securities lent,
 - type of collateral received,
 - whether the pool has the ability to pledge or sell collateral securities without a borrower default,
 - the amount by which the value of the collateral provided is required to exceed the value of underlying securities.
 - any restrictions on the amount of the loans that can be made,
 - any loss indemnification (i.e., a securities lending agent's guarantee that it will protect the lender from certain losses).
 - fair values of underlying securities at the balance sheet date;
 - ? whether the maturities of the investments made with cash collateral generally match the maturities of their securities loans, as well as the extent of such matching at the balance sheet date;
 - ? the amount of credit risk, if any, related to the securities lending transactions (if the lender has not credit risk, that fact should be stated);
 - ? the amount of any losses on the securities lending transactions during the period resulting from the default of a borrower or lending agent and amounts recovered from prior period losses, if not separately disclosed in the operating statement.

(For more details, see the GASB Statement 28, Accounting and Financial Reporting for Securities Lending Transactions)

- 4/ Pools may disclose realized gains and losses computed as the difference between the proceeds of the sale and the original cost of the investments sold. They also should disclose that:
 - a. The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments.
 - b. Realized gains and losses on investments that had been held in more than one fiscal year and sold in the current year were included as a change in the fair value of investments reported in the prior year(s) and the current year.

(For more details, see the GASB Statement 31.)

$\underline{\text{NOTE 4 - LONG-TERM DEBT}} \ \underline{1} /$

NOTE 5 - SELF-INSURED RETENTION

The Pool retains responsibility for the payment of claims within specified self-insured retention limits prior to the application of coverage provided by its excess insurance contracts.

NOTE 14 - PENSION PLANS

Substantially all <u>(pool name)</u> full-time and qualifying part-time employees participate in one of the following statewide retirement systems administered by the Washington State Department of Retirement Systems under cost-sharing multiple-employer defined benefit public employee retirement plans. The Department of Retirement Systems (DRS), a department within the primary government of the State of Washington, issues a comprehensive annual financial report containing historical trend information and may be obtained from the Department of Retirement Systems, Administrative Services Division, P.O. Box 48380, Olympia, WA 98504-8380. The following disclosures are made pursuant to GASB Statement 27, *Accounting for Pensions by State and Local Government Employers*.

Public Employees' Retirement System (PERS) Plans 1 and 2

Plan Description

PERS is a cost-sharing multiple employer retirement system. Membership in the system includes: elected officials; state employees; employees of the Supreme, Appeals, and Superior courts (other than judges in a judicial retirement system); employees of legislative committees; college and university employees (not in national higher education retirement programs); judges of district and municipal courts; non-certificated employees of school districts; and employees of local governments. The PERS system includes two defined benefit pension plans. Participants who joined the system by September 30, 1977, are Plan 1 members. Those joining thereafter are enrolled in Plan 2. Retirement benefits are financed from employee and employer contributions and investment earnings. Retirement benefits in both Plan 1 and Plan 2 are vested after completion of five years of eligible service. Retirement benefit provisions are established in state statute and may be amended only by the state legislature.

Plan 1 members are eligible for retirement at any age after 30 years of service, or at age 60 with five years of service, or at age 55 with 25 years of service. The annual pension is two percent of the average final compensation per year of service, capped at 60 percent. The average final compensation is based on the greatest compensation during any 24 eligible consecutive compensation months. If qualified, after reaching age 66, a cost-of-living allowance is granted based on years of service credit and is capped at three percent annually.

Plan 2 members may retire at age 65 with five years of service, or at age 55 with 20 years of service, with an allowance of two percent per year of service of the average final compensation. Plan 2 retirements prior to 65 are actuarially reduced. There is no cap on years of service credit and a cost-of-living allowance is granted, capped at three percent annually.

There are 1,177 participating employers in PERS. Membership in PERS consisted of the following at December 31,2000:

Retirees and Beneficiaries Receiving Benefits	61,088
Terminated Plan Members Entitled To But Not Yet Receiving Benefits	17,314
Active Plan Members Vested	98,018
Active Plan Members Nonvested	54,243
Total	230,663

Funding Policy

Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates and Plan 2 employer and employee contribution rates. Employee contribution rates for Plan 1 are established by statute at six percent and do not vary from year to year. The employer and employee contribution rates for Plan 2 are set by the director of the Department of Retirement Systems based on recommendations by the Office of the State Actuary to continue to fully fund Plan 2. All employers are required to contribute at the level established by state law. The methods used to determine the contribution requirements are established under state statute in accordance with Chapters 41.40 and 41.45 RCW.

The required contribution rates expressed as a percentage of current year covered payroll, as of December 31, 2001, were:

	PERS Plan 1	PERS Plan 2
Employer	1.77% *	1.77% *
Employee	6.00%	0.88%

^{*} The employer rates do not include the employer administrative expense fee currently set at 0.23%.

Both <u>(pool name)</u> and the employees made the required contributions. The <u>(pool name)</u>'s required contributions for the years ended December 31 were:

	PERS Plan 1	PERS Plan 2
2001	\$	\$
2000	\$	\$
1999	\$	\$

NOTE 15 - DEFERRED DEBITS (OR CREDITS)¹/

In accordance with generally accepted	l accounti	ng princij	ples for regulated businesses, the Pool has deferred (losses,
costs, receipts, etc.) of \$	in	, \$	in, which will be amortized on the
method over		years.	These (losses, costs, receipts, etc.) resulted from _(brief
description . These debits or credit	s) would	have been	included in net income for and, in nonregulated
businesses, but for rate-making purpos	ses they ar	re treated	as applicable to future periods.
NOTE 16 - POSTEMPLOYMENT BENI	EFITS OTI	HER THA	N PENSION BENEFIT ^{2/}
In addition to the pension benefits des	cribed in I	Note	, the <u>(pool name)</u> provides postemployment health care
benefits, in accordance with <u>(authority</u>	<u>y under wl</u>	hich the b	enefit is provided) 3/ to (number, category) employees who
(description of eligibility for the benefit	<u>ts)</u> . ^{4/} Cu	rrently, _	(number) retirees meet those eligibility requirements.
•	and their	dependen	nt of validated claims for medical, dental, and hospitalization ts. The Pool also reimburses a fixed amount of \$
Employer contributions are financed or	n pav-as-v	7011-go ba	sis. $\frac{6}{}$ Expenses for postemployment health care benefits are
			for estimated claims incurred but not yet reported to the Pool.
	•	•	
During the year, expenses of \$	were	recognize	ed for postemployment health care. 7/
Approximately \$ of the \$	'	increa	ase in expenses over the previous year was caused by the
addition of dental benefits, effective	(<u>date)</u> . 8/	/	

 $[\]underline{1}$ / The need for the entire note depends on the particular circumstances of the public entity risk pool.

Other postemployment benefits (OPEB) are benefits provided by an employer to plan participants, beneficiaries, and covered dependents through a plan or other arrangement that is separate from a plan to provide retirement income, except for postemployment health care benefits which are always OPEB. In addition to postemployment health care benefits, OPEB may include life insurance, disability income, tuition assistance, legal services, and

other assistance programs. OPEB do not include social security benefits financed.

(FOOTNOTES CONTINUED)

through FICA payroll taxes. However, if the employer pays postemployment contributions applicable to retirees for additional Medicare benefits, those benefits should be considered postemployment health care benefits and should be included in all relevant disclosures. Whether a particular type of benefits should be consider pension benefits or OPEB depends on how the benefit is provided.

The note should be made for the pool as a whole, but if aggregate disclosure would be misleading, additional separate disclosures should be made for fund types or component units.

- 3/ Statute, contract, etc.
- 4/ Participants currently eligible for benefits are retirees, terminated employees, and beneficiaries for whomthe pool is currently responsible for paying all or part of the premiums, contributions, or claims. Covered dependents should be counted as one unit with the participant.
- 5/ Describe the pool's and participants' obligation to contribute. The information must be quantified (percentage, dollars contributions rates, etc.).
- 6/ If OPEB are advance-funded on an actuarially determined basis, the employer should disclose the actuarial cost method and significant actuarial assumptions (including the interest rate, and, if applicable, the projected salary increase and the health inflation assumptions) used to determine funding requirements, and the method used to value plan assets.
- The amount should be net of participant contributions. If the benefit payments cannot be readily separated from expenses for similar types of benefits provided to active employees and their dependents, the entity may use reasonable methods to approximate the OPEB expenses. If this is not possible, the note should disclose that the OPEB expenses cannot be reasonably estimated.

If OPEB are advance-funded on an actuarially determined basis additional information should be provided in this paragraph:

- the number of active plan participants,
- the pool's actuarially required and actual contributions for the period (net of participants contributions).
- the amount of the net assets available for the OPEB.
- the actuarial accrued liability and unfunded actuarial accrued liability for OPEB according to the actuarial cost method in use.
- 8/ Describe any significant matters that affected the comparability of the current year data with the previous periods.

Any additional information that the employer believes will help users assess the nature and magnitude of the cost of the employer's commitment to provide OPEB should also be disclosed.

NOTE 17 - ACCOUNTING CHANGES 1/

NOTE 18 - EXTRAORDINARY ITEMS^{2/}

NOTE 19 - PRIOR PERIOD ADJUSTMENTS 3/

- 1/ Any changes in accounting policies that could affect comparisons between financial statements should be disclosed here.
- 2/ Extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence.

Thus, both of the following criteria should be met to classify an event or transaction as an extraordinary item:

- a. Unusual nature the underlying event or transaction should possess a high degree of abnormality and be of a type clearly unrelated to, or only incidentally related to the ordinary and typical activities of the public entity risk pool.
- b. Infrequency of occurrence the underlying event or transaction should be of a type that would not reasonably be expected to recur in the foreseeable future.

Descriptive captions and the amounts for individual extraordinary events or transactions should be presented, preferably on the face of the operating statement, if practicable. Otherwise, disclosure in related notes is acceptable. The nature of an extraordinary event or transaction and the principal items entering into the determination of an extraordinary gain or loss should be described.

3/ Adjustments related to prior periods (and thus excluded from the operating statements for the current period) are limited to: (a) corrections of material errors in the financial statements of a prior period; and, (b) other material adjustments which meet the criteria for prior period adjustments contained in the prescribed system of accounts. The circumstances surrounding each such adjustment should be separately explained in this note.

NOTE 20 - CONTINGENT LIABILITIES AND LITIGATION 1/

NOTE 21 - SUBSEQUENT EVENTS 2/

- 1/ This note should disclose any material contingent liabilities. These are items which are uncertain now, but may result in liabilities in the future, such as pending lawsuits, guarantees, etc.
- 2/ This note should disclose any events that occurred after the financial statement date and have a material effect on the operations of the public entity risk pool.

RISK POOLS

REQUIRED SUPPLEMENTARY INFORMATION

GENERALINSTRUCTIONS

The sample required supplementary information which follow was designed to provide the disclosures required for public entity risk pools. They are intended to furnish you with ways of phrasing the disclosures you will need to make. Be sure to revise these sample documents to fit the unique circumstances of your pool, to delete disclosures that do not apply to your operations, and to add others that we did not include but which are needed to help a reader understand your financial statements.

The following revenue and claims development information should be included as required supplementary information *immediately after* the Notes To Financial Statements in the pool's financial reports.

- (1) A table that presents the following information:
 - (a) Amount of gross premium (or required contribution) revenue and reported investment revenue, amount of premium (or required contribution) revenued ceded, and amount of net reported premium (or required contribution) revenue (net of excess insurance or reinsurance) and reported investment revenue for each of the past ten fiscal years including the latest fiscal year.
 - (b) Amount of reported unallocated claim adjustment expenses (GASB Statement 10, paragraph 23) and reported other costs (GASB Statement 10, paragraph 31) for each of the past ten fiscal years including the latest fiscal year.
 - (c) Total gross amount of incurred claims and allocated claim adjustment expenses (both paid and accrued before the effect of loss assumed by excess insurers or reinsurers), loss assumed by excess insurers or reinsurers (both paid and accrued), and total net amount of incurred claims and allocated claim adjustment expenses (both paid and accrued). Amounts should be presented as originally reported at the end of each of the past ten accident years (for occurrence-based policies or contracts), report years (for claims -made policies or contracts), or policy years including the latest year. Amounts should be limited to provisions for claims resulting from events that triggered coverage under the policy or participation contract in that year. If amounts are not presented on an accident-year basis or a report-year basis, they should be reported on a policy-year basis. The basis of reporting should be used consistently for all years presented.
 - (d) The cumulative net amount paid as of the end of the accident year, report year, or policy year (as appropriate) and each succeeding year for each of the incurred claims and allocated expense amounts presented in (c) above.
 - (e) The reestimated amount for loss assumed by excess insurers or reinsurers as of the end of the current year for each of the accident years, report years, or policy years (as appropriate) presented in (c).
 - (f) The reestimated amount for net incurred claims and claim adjustment expenses as of the end of each succeeding year for each of the accident years, report years, or policy years (as appropriate) presented in (c).
 - (g) The change in net incurred claims and claim adjustment expenses from the original estimate, based on the difference between the latest reestimated amount presented in (f) above for each of the accident years, report years, or policy years (as appropriate) and the original net incurred claims and claim adjustment amounts reported in (c).

Percentage information (for example, the percentage of gross incurred claims and claim adjustment expenses assumed by excess insurers or reinsurers) may be presented but is not required. If presented, this information should not obscure or distort required elements of the table.

- (2) In addition to the reconciliation of total claims liabilities (GASB Statement 10, paragraph 49g), a reconciliation of claims liabilities by type of contract, including an analysis of changes in liabilities for claims and claim adjustment expenses for the current fiscal year and the prior year, in the same tabular format required by the GASB Statement 10, paragraph 49g.
- Ouring the transition period when the ten years of information about claims liabilities and claim adjustment expenses may not be available, all information required by item (1) above should be presented only for as many years as that information is available. If changes in a pool's loss, expense, reinsurance, excess insurance, or other transactions materially affect pool revenues, expenses, or liabilities in a manner not fairly disclosed or presented in the tables above, the pool should expand these disclosures to show additional detail (such as separate information for each type of contract) to keep the schedules from being misleading or to keep trends from becoming obscured.

(Pool Name) REQUIRED SUPPLEMENTARY INFORMATION ______, _____Through ______,

This required supplementary information is an integral part of the accompanying financial statements.

(NOTE: The following tables should be presented immediately after the Notes To Financial Statements. The information contained in these tables should be modified to fit the needs of each public entity risk pool.)

1. <u>Ten-Year Claims Development Information</u>

The table below illustrates how the pool's earned revenues (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the pool as of the end of each of the last ten years. The rows of the table are defined as follows:

- 1. This line shows the total of each fiscal year gross earned contribution revenue and investment revenue, contribution revenue ceded to reinsurers, and net earned contribution revenue and reported investment revenue.
- 2. This line shows each fiscal year's other operating costs of the pool including overhead and claims expense not allocable to individual claims.
- 3. This line shows the pool's gross incurred claims and allocated claim adjustment expenses, claims assumed by reinsurers, and net incurred claims and allocated adjustment expenses (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).
- 4. This section of ten rows shows the cumulative net amounts paid as of the end of successive years for each policy year.
- 5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each accident year.
- 6. This section of ten rows shows how each policy year's net incurred claims increased or decreased as of the end of successive years. (This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known.)
- 7. This line compares the latest reestimated net incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of net claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of net incurred claims currently recognized in less mature policy years. The columns of the table show data for successive policy years.

SCHEDULE 19 - LABOR RELATIONS CONSULTANT(S)

The 1993 Legislature has required the State Auditor's Office to collect information regarding the role labor relations consultants play in local governments. This reporting requirement is found in RCW 43.09.230, as amended by the 1993 Legislature. The statute provides that "the legislature finds and declares that the use of outside consultants is an increasing element in public sector labor relations. The public has a right to be kept informed about the role of outside consultants in public sector labor relations. The purpose of this act is to help ensure that public information is available."

Labor relations is a broad spectrum of activities which concern the relationship of employees as a group with the local government as employer. It includes employee representation issues, negotiation of contracts, and preparation and conduct of interest arbitrations.

A *labor relations consultant* is someone who agrees to perform such services for compensation. For example, a labor relations consultant includes an attorney or other professional engaged by the local government to negotiate a collective bargaining agreement. It would not include a firm engaged to establish a personnel manual or to prescreen job applicants. The determining factor is the substance of services the consultant has been engaged to perform.

This schedule is used to identify expenditures for labor relations consultants. Disclosure should include identification of each consultant and the terms and conditions of each agreement.

The schedule is required to be filed with the State Auditor's Office whether or not your pool has labor relations consultants. Prepare a schedule for each consultant. Alternative formats are acceptable, including spreadsheets, as long as the required information is provided.

STATISTICAL DATA

	(Pool Name)
1.	Fiscal year:,,,
2.	Type of pool:
	a. Property
	b. Casualty
	c. Liability
	Organization of above type pool:
	Joint purchasing only
	Joint purchasing with self-insured retention
	Self-insurance with pool purchased excess policy
	Self-insurance only
	Other (identify)
	d. Unemployment
	e. Workers' compensation
3.	List all pool purchased insurance policies:
	a. Jointly purchased policies for participating members.
	(1) Type of policy
	(2) Insurance company
	(3) Period of coverage(s)
	(4) Amount of coverage(s)
	(5) Premium cost
	(6) Pool self-insured retention limit
	(7) Participating member self-insured retention limit
	b. Purchased policies for pool.
	(1) - (7) same as above.
4.	Type of pool organization:
	a Municipal corporation
	b Quasi-municipal corporation
	c Private nonprofit corporation
5.	Date pool approved by State Risk Manager:,
6.	Date pool began operations:,

7.	Do you use a broker to obtain any of the above listed purchased insurance policies?			
	YESNO. If YES, indicate which policies each broker obtains for the pool. If NO, indicate whether you have a qualified broker on staff. If neither, indicate the process by which you obtain these purchased insurance policies.			
8.	Do you use a surplus line of coverage broker in your pool operation?			
	YESNO. If YES, identify the broker and policy involved. Explain why it is necessary to use this arrangement for the insurance coverage(s) you obtain for the pool and/or participating members.			
9.	Are local insurance agents involved in any way with the operation of your pool (except for the use of brokers as identified above)?			
	YESNO. If YES, please describe their function.			
10.	Are your pool offices:			
	a. Separate from any other government?			
	 Provide complete mailing address and telephone number. Provide name of contact point. Number of employees on staff: 			
	b. Contained within a host government?			
	 Identify host and provide complete mailing address and telephone number. Provide name of contact point. Number of employees of host government dedicated to pool functions? 			
11.	Public treasury function used:			
	 a Pool acts as own treasurer. b Pool uses a county treasurer direct (identify). c Pool uses a participating member associated with a county treasurer (identify both). d Pool uses a participating member who acts as own treasurer (identify). 			
12.	Pool investment policy:			
	 a Pool invests own funds directly. b Pool has a county treasurer invest funds. c Pool invests funds with the State Investment Board. 			

13.	Describe the governing body of your pool, how many members there are, and how often they meet. Examples follow:
	a. The board of directors is responsible for overall policy and procedures of the pool. It has one voting member from each participating government entity, and meets annually.
	b. The day-to-day operations of the pool are governed by a management committee. It is composed of nine voting members who are elected by the board of directors, and meets monthly.
14.	Are pool claims:
	 a. Administered by pool staff? b. Administered by a third party administrator? If YES, identify the name and address of the firm.
15.	Does the pool use the services of an actuary? YES NO. If YES, identify the name and address of the firm.
16.	Does your pool use the services of a private certified public accountant (other than the State Auditor's Office)?
	YESNO. If YES, identify the name and address of the firm, and the type of accounting/auditing services provided.
	Were these services obtained by contract through the State Auditor's Office?
	YES NO.

Risk Pools 7-9 (Rev. 8/02)

RISK POOL MEMBER

NOTES TO FINANCIAL STATEMENTS

NOTE: (a) The document which follows is only a sample to illustrate a portion of the Notes To Financial Statements for a participating pool member. This document should be tailored to meet the needs of each individual public entity risk pool and distributed to each participating pool member for use in the Notes To Financial Statements for their annual financial reports, (b) this information may also be used to describe the general operations of the public entity risk pool, and (c) this should be sent to each participating member of the pool.

NOTE X - RISK MANAGEMENT (for participating member of pool)

or

NOTE 1 - GENERAL (for public entity risk pool)

The <u>(city/county/district)</u> is a member of the <u>(pool name)</u> (Pool). Chapter 48.62 RCW authorizes the governing body of any one or more governmental entities to form together into or join a pool or organization for the joint purchasing of insurance, and/or joint self-insuring, and/or joint hiring or contracting for risk management services to the same extent that they may individually purchase insurance, self-insure, or hire or contract for risk management services. An agreement to form a pooling arrangement was made pursuant to the provisions of Chapter 39.34 RCW, the Interlocal Cooperation Act. The Pool was formed on <u>(date)</u> when <u>(city/county/district)</u> in the state of Washington joined together by signing an Interlocal Governmental Agreement to pool their self-insured losses and jointly purchase insurance and administrative services. <u>(Number of participating members)</u> <u>(city/county/district)</u> have joined the Pool.

The Pool allows members to <u>(state purposes: i.e., jointly purchase insurance coverage, establish a plan of self-insurance, and provide related services, such as risk management, etc.)</u>. (State type of policy coverage: i.e., coverage for public official liability is on a "claims made basis." All other coverages are on an "occurrence" basis.) The Pool provides the following forms of group purchased insurance coverage for its members: list by type of policy: i.e., property, liability, vehicle, other mobile equipment, electronic data processing equipment, bonds of various types, excess liability, public official liability, and machinery breakdown, etc.

Members make an annual contribution to fund the Pool. The Pool acquires insurance from unrelated underwriters that are			
subject to a per-occurrence deductible of \$ Members are responsible for the first \$ of the			
deductible amount of each claim, while the Pool is responsible for the remaining \$ Insurance carriers cover			
all losses over \$ to the maximum limits of each policy. Since the Pool is a cooperative program, there is a			
joint liability among the participating members.			

Each new member pays the Pool an admittance fee. This amount covers the member's share of organizational expenses and the cost of analyzing their loss data and risk profile. Members contract to remain in the Pool for a minimum of (number) year(s), and must give notice (number) year(s) before terminating participation. The Interlocal Governmental Agreement is renewed automatically each year after the initial (number) year period. Even after termination, a member is

were a signatory to the Interlocal Governmental Agreement.
The Pool is fully funded by its member participants. Claims are filed by members with <u>(name of third party administrator.</u>
if appropriate) which has been contracted to perform claims adjustment, loss prevention, and property appraisal services
for the Pool. Fees paid to the third party administrator under this arrangement for the years ended,
1/ and2/, were \$ and \$, respectively, which included fees for appraisal services. For
3/, the Pool has contracted with the third party administrator to perform claims adjustment and loss prevention
services for \$
The Pool is governed by a board of directors which is comprised of one designated representative from each participating
member. An executive committee is elected at the annual meeting, and is responsible for conducting the business affairs
of the Pool.
1/ Insert current reporting year.
2/ Insert previous reporting year.
3/ Insert next reporting year.

still responsible for contributions to the Pool for any unresolved, unreported, and in-process claims for the period they
